Product Data Sheet

Shield 3M 9100

Vinyl Scraper Matting

Z-webbed heavy duty matting without backing

Shield 3M 9100 is an unbacked heavy duty 'Z-web' mat that is designed for recessed applications in demanding environments. The peaked edge of each web provides increased slip resistance and a very effective scraping action for dirt, grit and particle removal. Being unbacked means the trapped grit can easily pass through for easy clean up.

Also suitable for wet areas, such as snow regions, by being able to remove compacted snow with ease. This matting will resist 'pack down' and has been lab tested for extremely high traffic levels - more than 1,000,000 people per year.

- Suitable for high traffic applications
- Suitable for snow/wet areas
- Suitable for wheelchair and light wheel traffic
- Withstands extreme temperatures
- Easy to clean
- UV resistant and won't fade

Specification Guide

Install Integra Shield 9100 entrance matting in colour (insert colour), comprising of resilient vinyl coiled loops. If required, install Integra aluminium mat frame to suit recess, or bevelled rubber edging for loose lay applications, in accordance with manufacturer's recommendations. Available from Classic Architectural Group, 1300 244 377, info@classic-arch.com
