

## Cruising Yacht Club of Australia Enhancing safety and access for yachting enthusiasts

### Case Study

*Location: Sydney, NSW*

*Architect: Allen Jack + Cottier*

*Industry: Sports & Entertainment*

*Contractor / Builder: Belmadar*

### Project Overview

The Cruising Yacht Club of Australia (CYCA) has a design that combines modern and classic features in its traditional location on the Rushcutters Bay foreshore. The new Clubhouse has been designed to improve accessibility, increase space and flow, and enhance comfort.

### Classic Solution

With increasing membership and access requirements, the pedestrian safety and enhanced access is essential across the premises as well as on the stairs.

To enable this, Classic supplied and installed SNR019 aluminium safety stair nosing for hard substrate stairs, stainless steel individual tactiles – SH10N – in natural and black across the premises as well as Poly tactile pads – PT30 – in black to ensure easy access for visually impaired individuals as well.

Tactiles

Stair Nosing

### Application

• Internal and external application • Stair nosing for hard substrates

### Access & Safety Enhanced

- Clean, dry and safe floors for yachting enthusiasts.
- Safe passage on stairs fitted with anti-slip nosings
- Enhanced access experience for visually impaired

Case Study:

## Enhancing safety and access for yachting enthusiasts

### Tredfx SNR019 Stair Nosing

---

- Safety ribbed aluminium
- Ramped back
- Short raked front
- Point 4

### Tredfx SH10N (Black) TGSi

---

- T316 grade stainless steel
- Grooved 10 ring top only
- Rear nylon Stud
- Black anodised

### Tredfx SH10N TGSi

---

- T316 grade stainless steel
- Grooved 10 ring top only
- Rear nylon Stud
- Sloped sides for safe transition

### Tredfx PT30 TGSi

---

- Grooved 6 ring top
- 300 mm x 300 mm
- Bevelled edge for safe transition
- UV Resistant Poly material
